

# Smoking Prevalence Among California Adults, 1984-2006

Source: Behavioral Risk Factor Surveillance System (BRFSS) 1984-1992. BRFSS and California Adult Tobacco Survey data is combined for 1993-2006. The data is weighted to the 2000 California population.

Note change of smoking definition in 1996 that included more occasional smokers.

Prepared by: California Department of Health Services, Tobacco Control Section, March 2007.
